

4BOXES

BY OASIS PEOPLE & CULTURE

A fresh approach to development and performance.

What is 4Boxes?

4Boxes is a flexible online platform that enables your staff to simply capture and manage what's important in their personal and professional development. Designed to be highly collaborative and engaging, you and your organisation can plan activities and align goals as you work towards targeted outcomes – without all the bureaucracy and red tape. It's an intuitive online platform that will inspire users.

Think Inside the Box

Through four literal boxes, 4Boxes provides a flexible online space for you to create, store, and report on goals to track and nurture individual development. It's a central hub where individuals can keep resources that support growth, such as personal assessment reports, their CV, and other learning materials.

Performance Management, Reimagined

Over many years, the feedback we consistently received from organisations was that they found performance management systems unengaging, tedious, and overly complicated. So, we designed a solution that is:

- Simple to use.
- Managed by the employee - that's the real game-changer!
- Discussion-based and accessible by a Manager or Coach.
- A driver for action, commitment, and change that can help align individual activity back to organisational priorities.
- Enhances employment interactions, feedback and relationships.

Other Valuable Features

- Secure login and data storage.
- Customisable categories.
- Document library.
- Archiving functionality.
- Secure spaces for notes and feedback.
- Reminder function.
